Masuma Islam is one of the Director of Cosmoplastic LTD she is more dynamic in her field, especially in manufacturing and trading, A few positive qualities such are like honesty, dedication, leadership, and innovation made her as role model in plastic manufacturing and trading sector.

Overview of The Plastic Industry in Bangladesh

Bangladesh has exported plastic and plastic-made goods worth 1 billion dollars in the fiscal year 2017-18, from which 1.9 billion worth was supplied locally. It was 20% more than the previous year. Locally the high requirement for plastic is due to the ever-growing demand for plastic furniture, household plastic equipment, plastic hardware, toys, and so on. Besides, industrial packaging requires a large bulk of plastic production. Yet, Polyolefin, one of the fundamental ingredients for plastic, is not in abundance in the country's resources. Hence, we depend on China, India, Thailand, and other neighboring countries to acquire the raw materials. Regardless, there are 142 different types of plastic being used in production and is expected to add more in the future. On average, a Bangladeshi citizen uses 6 kilograms of plastic. Compared to India, it is half what Bangladeshi citizens consume. The average use is nearly 30 kilos in south-east Asia and 40 kilos in the Middle East. Compared to that, we are trailing behind. The plastic industry is being reinforced; manufacturing factories are high in number reaching over 5000. 98% of which is SME included. Nearly 15 lakh people are employed in the plastic industry of Bangladesh; 2 lakh in the lower unit, 5 lakh in the middle unit, 1 lakh in the top unit and another additional 6 lakh people are indirectly working in the sector.

Plastic Prosper & Prospect : The plastic sector is a major segment of great potential for Bangladesh for making significant contribution in terms of both domestic market-oriented as well as an emerging export-oriented expanding domestic manufacturing base, generating industrial employment, accelerating private investment and inflow of more foreign exchanges as well as growing expansion of markets of diversified products at home and abroad. It has a significant contribution to infrastructure development programmes, construction, general engineering, agro-food processing, automotive, packaging etc. The industryis also expressive of increasingly innovative connections with the green economy

OUR PRODUCTS & Services

Based on market demand cosmo plastic ltd. manufactutring few unique and qualityful plastic meterial for home and industrial use, most of the products are up to the mark and shine inside out PPcap, HDPE container, CSD are the most popular among of them
